

Orisa Ososi

Ososi is the spirit of the hunter, one that is skillful and crafty, patient and methodical in its approach, and swiftly lethal once the opportunity presents itself to strike. Solitary in nature, the ultimate survivalist who quietly camouflages himself to blend with nature. He is the magician/shaman and seer who understands nature and bends it to his will. His stealth approach to track, stalk and study his prey enables him to use the prey's very own nature to his advantage. The quality traits of the ultimate hunter include independently living off nature by foraging, trapping, and hunting, weathering storms, being comfortable alone with oneself, and patiently waiting until the right moment to strike.
